

# Art Set Work - Term 2 2019

The Yr 3-6 students have been learning about One Point Perspective drawings during Art lessons. We learnt about vanishing points, 3D drawing and how drawing objects from larger to smaller encourages your eye to be drawn to a vanishing point.

Year 5 and 6 drew their picture from the perspective of standing in a city looking up towards the skyline. They made 3D buildings of different heights, width and design. The students created a skyline of their choice after studying colours in a sunrise/sunset.
