without being exposed to harmful material. We must be on a united front in addressing this issue and these workshops are an important step in that direction.

The library building scheduled as part of the Government’s Building Education Revolution (BER) project, is due to begin in January next year. I will keep you updated on any further developments regarding this.

Finally, SOTA Muster for Years 4 to 7 students is less than four weeks away. Please make sure you have signed all relevant forms and read information regarding what promises to be another awesome event. This information is available from our website or simply contact the school.

That concludes my slightly long report. Remember to regularly check our website which has direct access to upcoming events, a showcase of student work, parent forms, camp photos, newsletters, home tutor hints and timetables. We will be using this site more and more as a portal for students to access learning programs and communicate too.....so stay tuned to the active http://www.carnarvonsota.wa.edu.au/ site.

Yours sincerely
Jim Peletier
