

Getting an Egg Into a Bottle

Tuesday 20 July 2010

Prediction:

I predict that the egg will be sucked up by the bottle, because as the hot air inside the bottle takes over the oxygen, the pressure will increase sucking up the egg

Photograph:

Outcome:

The egg did manage to get sucked in by the bottle. But at the very end the egg split and broke. But we did realise how the heat inside causes it to suck.
