

# Name of Experiment: Shining coins

Date: 21 / 7/ 10

Mitchell

<p><b>What are you testing ?</b> <b><u>Independent Variable</u></b> <b><u>What are you testing?</u></b></p>	<p>Testing to see if tomato paste, vinegar, and saltwater will clean coin the same.</p>
<p><b>What changes do you observe ?</b> <b><u>Dependent Variable</u></b> <b><u>What changes do you see?</u></b></p>	<p>Vinegar and tomato mixed together cleaned best. Saltwater mix didn't change the coin at all. The acid mixers cleaned best.</p>
<p><b>What HAS to stay the time each time you trial this experiment ?</b> <b><u>Controlled Variable</u></b> <b><u>What has to stay the same?</u></b></p>	<p>The coins and the amount of mixture I used and the time it sat on the coins.</p>
